National cancer screening films

Julie is meeting this week to discuss a business case to go to the National team for funding to progress the screening films. – Feedback next meeting

Health Quality Checkers

The team at Skills for people are completing the report for Gateshead Breast Screening. This should be finalised in the New Year.

Julie has costings for completing Health Quality Checks in the other breast and bowel programmes across the region and is looking for funding.

Be Screening Aware

Working with 3 self-advocacy groups; Skills for People, Speak up together and People First.

We are still in development phase, creating the training programme. This will be a modular approach with end users able to identify which programmes they would like to learn about.

Cervical screening

New project has started looking at women who do not attend cervical screening including women not brought and those removed from screening list. PRIMUS currently developing data search. Report expected in New Year. Once we have the data we will progress the work.

Galleri Trial

An information sheet on the trial has been developed for community learning disability teams.

This has been circulated. Any additional questions regarding the trial contact Jo Mackintosh.
